

MM-9662

Hydraulic Stop Leak and Booster

MM-9662 is a hydraulic oil boost and stop leak blended from synthetic base stocks and proprietary additives. It works to stop leaks in seals, enhance lubricity, and decrease wear to increase the life of a hydraulic fluid.

MM-9662 is compatible with petroleum-based mineral and synthetic fluids. Not for use with water-glycol or phosphate ester fire-resistant hydraulic fluids.

Treat rate is 1% of system intake.

- 1-quart treats 25 gallons
- 1 gallon treats 100 gallons
- 5 gallons treats 500 gallons

ATTRIBUTES

- Protects against wear, rust and corrosion
- Increases existing fluid life
- Stops leaks in seals
- Controls carbon and varnish to help reduce deposits

TYPICAL LUBRICANT PROPERTIES

MM-9662 Grades	46
Viscosity Index	109
Viscosity cSt @ 40°C	47
Viscosity cSt @ 100°C	7.1
Flash Point °F (°C)	435(223)
Pour Point °F (°C)	-35 (-37)
Rust Test	Pass
Copper Corrosion, 24 Hr	1b
